

PrediShark.ai Whitepaper

Slogan: Your intuition and our
profitable analyses make you a **TOP** Bettor.

PrediShark AI

Whitepaper

1. Executive Summary

At launch, the entire platform is completely free to use. This gives the community the opportunity to experience and verify for themselves how superior and profitable PrediShark's AI predictions truly are. Users receive precise predictions for selected football matches, can submit their own predictions, and participate in the community – with winners receiving vouchers, free bets, or other prizes.

Through affiliate partnerships with top casinos, we automatically show you the best available odds, deposit bonuses, and Refer-a-Friend advantages. Additionally, through partnerships with major sports websites and influencers, users benefit from exclusive content, extra promotions, and significantly increased reach. As the project grows, a fair subscription model will be introduced.

Our goal: To turn casual bettors into long-term profitable “TOP bettors” – powered by data, AI, and community strength.

2. The Problem in the Sports Betting Industry

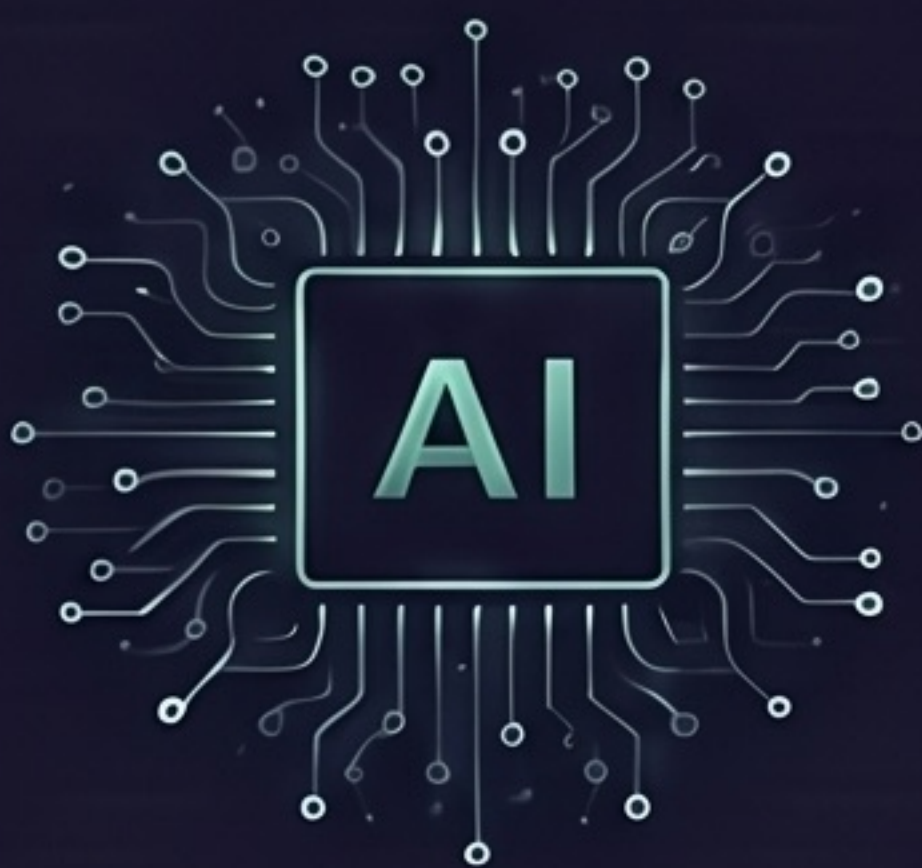

Most football betters lose money in the long run because:

- Emotions and good feelings dominate decision-making
- The flood of data (form, statistics, news) is overwhelming and hard to process
- The best odds and bonuses are scattered across dozens of providers and difficult to compare
- There is a lack of transparent, verified prediction histories (track records)
- Community features and gamification are almost non-existent – betting remains a lonely activity

PrediShark solves these exact pain points.

3. Our Solution: PrediShark.ai

PrediShark.ai is your central hub for:

- AI-driven, profitable football predictions (1X2, Over/Under, BTTS, Asian Handicap, etc.)
- Direct links to the best market providers with the highest odds
- A vibrant community where users compete against each other and against the AI
- Gamification elements with real rewards (vouchers, free bets)

The platform is user-friendly, mobile-optimized, and launches completely free.

4. Core Features at Launch

- **AI Predictions** for your chosen matches – select any league or fixture and receive a detailed explanation + confidence level

- **Community Game Prediction** – submit your own predictions, votes, and win prizes

- **Refer-a-Friend** – recommend friends to casino partners and earn a share of the generated betting volume (lifetime commission)

- **Multiple Languages** – launch in German + English, with more languages added quickly

5. Detailed AI Explanation

Our AI is the heart of PrediShark. It is continuously trained and backtested.

What data is used? (more than 50 features per match)

- Expected Goals (xG) & xGA – sourced from FBref, Understat, and StatsBomb
- Current Form – last 6–10 matches, home/away splits, rolling averages
- Head-to-Head (H2H), Weather Data, Referee Statistics & much more
- Team Motivation, Injuries & Suspensions
- Travel fatigue, tactical formations, market sentiment, news sentiment, and many more

The AI does not promise “sure bets” but delivers data-driven probabilities that are profitable in the long run – combined with your own intuition.

6. Technical Overview – PrediShark Prediction Engine

PrediShark.ai is based on a proprietary Multi-Agent AI Ensemble System that intelligently connects real-time sports data, mathematical history, and current news.

The system combines:

- High-quality external sports data APIs (including BetRadar, BetGenius & more)
- Multiple leading Large Language Models in a Master-Slave setup
- A proprietary mathematical reasoning layer with multiple validations
- A self-developed News-Scanning module for a large number of important match-influencing factors

Through an internal ensemble process with multiple runs per match (25–70 rolls), a consistent prediction accuracy of 55–62% is achieved. Only the 10–20 matches with the highest confidence are selected and published daily.

The entire architecture (PHP/Laravel + PostgreSQL + Redis) is specially optimized for speed, scalability, and data security and is continuously developed further.

Further technical details are available only to selected investors and partners in closed documents for competitive reasons.

7. Business Model & Monetization

Launch Phase: 100% free for all users

Revenue during Launch: Affiliate commissions from casino partners (on registration, deposits, or betting volume)

Subscription Pricing – PrediShark (after the free launch period)

Subscription Type	Price	Total Savings	Discount vs. Monthly
Weekly	€9.90	–	–
Monthly	€24.90	€0	–
5 Months	€99.90	€24.60	≈ 20%
Annual	€199.90	€98.90	≈ 33%

8. \$SHARK Token Overview

PrediShark Native Utility Token | Solana SPL

PrediShark introduces \$SHARK as its native utility token, launched on the Solana blockchain as an SPL token. The \$SHARK token serves as the economic backbone of the entire PrediShark ecosystem.

Token Supply

- Total Supply: 1,000,000,000 \$SHARK (One Billion Tokens)
- Minting Policy: Fixed supply, No additional minting possible.
- Circulating Supply: To be announced prior to TGE.

Token Utility

Use the \$SHARK token to unlock real benefits within the PrediShark ecosystem:

- **10% Discount on Subscriptions:** Pay with \$SHARK and receive an instant 10% discount on any subscription plan.
- **Weekly Revenue Buybacks:** 20% of all subscription revenue from payments not made with \$SHARK is used for weekly token buybacks, supporting long-term price stability.
- **Deflationary Token Burn:** 10% of every \$SHARK token used to pay for subscriptions is permanently burned, continuously reducing the total supply.

The Growth Flywheel

More subscribers → more revenue → larger weekly buybacks → stronger token → more users.

Legal Classification

\$SHARK is a pure utility token. It is not a security or investment contract.
